DETAILED ACTION

1. The application filed 4/21/04 has been examined. Claims 1-19 are pending.
2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
3. The IDS filed 4/21/04 has been considered.
4. Claims 15-17 are objected to because of the following informalities:
 - A. As per claim 15, "the target steering angle" lacks antecedence (see claim 12).
 - B. As per claim 16, it is unclear which vector (absolute or relative) is being referred to at line 1.
 - C. All claims depending from an objected base claim are also objected to as containing the same deficiencies.
5. Claims 1-19 are distinguishable over the prior art. As per claims 1, 18 and 19, the prior art of record does not show or reasonably suggest, in combination with the other claimed subject matter, a parking assist apparatus/method which includes a feature determining unit/means/step for determining a feature on the actual image through image recognition and path correction unit/means/step for automatically correcting a target path such that a correlation between a target parking position upon start of parking assist and the feature is maintained during execution of parking assist control, as claimed. Dependent claims 2-17 are distinguishable for at least the same reasons.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited documents are of general interest.

Art Unit: 3661

7. This application is in condition for allowance except for the following formal matters:

A. Correction of antecedence in claims 15 and 16 as noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte* Quayle, 1935 C.D. 11, 453 O.G. 213.

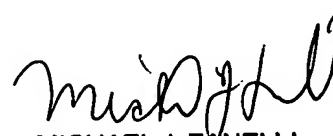

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
